

Now a full-service provider

Strategically located in Luxembourg, L.C.M.A. SA is a European producer, processor and distributor of semi-finished products in C.P. titanium and Ti6Al4V titanium alloy for aeronautical, medical, industrial,

LCMA anticipates continued increase in demand

inside the EU and has therefore developed the company into a full-service provider, focusing on on-time delivery, a wide range of services and a wide product portfolio, as well as on stability of supply.

As a European producer, the company says, its aim is to fill the supply gap for titanium products in Europe.

petro-chemical and other applications. The company has been present on the market since 1996.

With the titanium market growing dynamically worldwide, L.C.M.A. SA became a well-established European producer, and today is a part of a vertically integrated international group of companies covering the entire supply chain, from titanium mining through to production of a wide range of titanium products.

The product portfolio of L.C.M.A. includes titanium bars, titanium ingots, titanium tubes, titanium sheets/plates and titanium welding wire. In addition, the company offers a wide

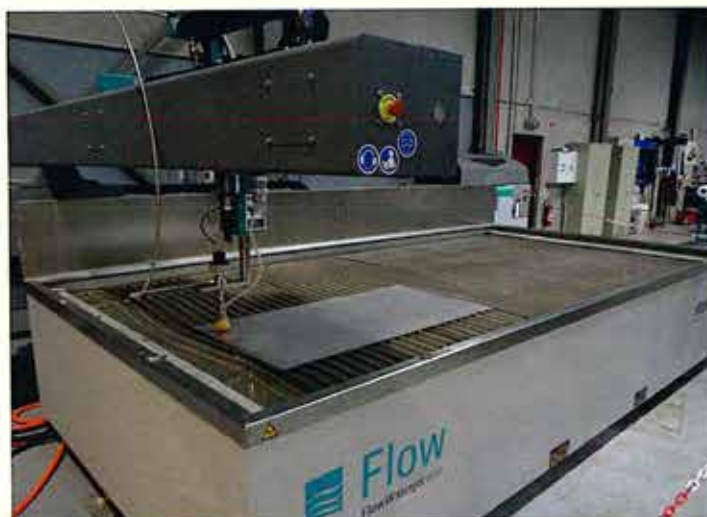

range of value added services such as band sawing, waterjet cutting and CNC turning services to its customers.

100% European production

In accordance with its strategy of producing 100% of its high quality products in Europe, L.C.M.A. launched a new product line in Grades 3 and 4 in 2014. The new production completes the portfolio of the company which now covers Grades 1, 2, 3, 4, and 5 in all possible diameters, and in accordance with the international quality standards ISO 9001:2008

and EN9100:2009/AS 9100:2009.

The management at L.C.M.A. SA currently anticipates an ongoing increase in demand for European production of titanium and titanium alloys
